About Me

A simple guy interested in Computer Science and a lot of other things. Blessed with good family and friends, my main goal in life is to become the best version of myself and continue to improve. A positive attitude and mind can solve any problem. Proud of my values and my life in general.

Interests

Computer Science, DevOps, software, basketball, music (especially piano), motorcycles, snowboard, Muay Thai, videogames and many others

Education

2018-2020 M.Sc. 110/110 — Ca'Foscari University, Venice
Majoring in Computer Science (Cybersecurity)

2015-2018 B.Sc. 104/110 — Milano-Bicocca University, Milan
Majoring in Computer Science

2010-2015 High school 81/100 — I.T.I.S. Pietro Paleocapa
Diploma in I.T.

Publications

2022 A Light Source Calibration Technique for Multi-camera Inspection Devices — ICPRAM, SciTePres

Coauthors: Filippo Bergamasco, Andrea Albarelli, Mara Pistellato
The thesis I developed and wrote was the first step of the method described in the article. Later on, the main authors performed a further optimization of the technique and provided both qualitative and quantitative tests

Certifications

2023 Certified Kubernetes Application Developer, Linux Foundation
2023 AWS Certified Solution Architect - Associate
2024 AWS Certified Developer - Associate

Experience

2015-2017 Pizza delivery guy — Part-Time
Here I learned about client interaction, patience and about the traffic system and house numeration in place in Italy. Moreover, learned to drive quads and scooters

2018-2020 Fifth Level Worker — Seasonal Job
During my period here, I strengthened my client interaction skill and polished my communication. I was responsible of the re furniture of products from the warehouse and some cashier activities

2020-Today Full Stack Developer Full-Time — Xenia Reply
My first real Computer Science experience. Worked in many languages and databases, both frontend and backend with some elements of mobile developing (Flutter with some native code for Android) and Devops (using Jenkins and the cloud stack provided by AWS). Heavily tech-focused with some interactions with clients

Other information

Review

My approach to work is being curious, always looking to the next thing to learn. I'm challenging myself to be more proactive and to expand both my knowledge and my technical capabilities. I love programming but I'm starting to develop a strong interest in DevOps activities. To me a good work environment and the and a strong work group mindset are very important.
